ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claimed invention is a Divisional of U.S. Patent No. 6,887,629, which is distinguished over the prior art of record in that the prior art does not teach a method of printing structures with a radiation-patterning tool, which has a domain that comprises a pair of features through which the actinic radiation is passed to print a pair of structures that are separated from one another by an edge-to-edge gap that is less than or about equal to the exposure wavelength; and the radiation-patterning tool domain further comprises an element between the pair of features, which is at least partially transparent to the radiation passed through the radiation-patterning tool but does not correspond to a discrete printed structure; and wherein the element modifies at least one of the structures printed from the pair of features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
